

Environmental Policy

Bio Pure Technology Ltd is committed to the protection of the environment, the prevention of pollution, the effective management and disposal of waste, control energy usage and the promotion of reuse and recycling of materials.

We are committed to continual improvement in our business operations and set objectives for all aspects under our control. Environmental performance is reviewed during 6 monthly Management Review meetings.

Our environmental objectives include:

- To comply with relevant legal and regulatory requirements including ISO 14001.
- Control the use of energy in our manufacturing facility and offices.
- Maintain and communicate policies which encourage employees, contractors and suppliers to contribute to the achievement of our objectives.
- To reduce, re-use and recycle the use of resources over which we have control.
- Implement measures to reduce the impact of staff travel.
- To influence clients regarding good environmental practice and sustainability with regard to the use and disposal of our products.

The Directors are the executives having particular responsibility for the Environmental Management System. All employees will co-operate with the company in fulfilling its responsibilities. Reference should be made to the Directors in the event of any difficulty arising in the implementation of this policy.

This Company Environmental Policy will be displayed prominently in the company website and at its offices. It is available to the public upon request.

This policy, and the associated procedures in the Environmental Management System, will be formally reviewed annually though on exception changes may be implemented at other times as required by changes in legislation, changes in company activities and external requirements.
