

Pharmaline N hose for pharmaceutical equipment cleaning

- **Reliable hose for cleanroom environment**
- **Resistant to CIP chemicals with long term hygienic performance**

This well-known and respected pharmaceutical manufacturer was looking for a reliable hose for their equipment cleaning system that could function as a pressure relief line for their main process pipework.

Aflex proposed Pharmaline N hose rather than the conventional silicone rubber which could not meet the application requirements, particularly in respect of resistance to CIP chemicals and long term hygienic performance.

With its chemically resistant liner, enclosed stainless-steel braid and wipe clean cover, Pharmaline N delivered all the attributes for a long, trouble-free life in the application.

Multiple Pharmaline N hoses have now been installed on the line to fill various applications in delivering

the finished asthma inhaler spray, through to packaging, as well as safeguarding the pressure integrity of the plant.
