

## Bioflex Ultra hose provides flexibility and purity in cleaning process

- **Bioflex Ultra – lotions, ointments and cosmetics facility**
- **Cleaning process in cleanroom environment**

A well-known pharmaceutical company was looking for a reliable hose for installation in their equipment cleaning system at their lotions, ointments and cosmetics facility. They needed a hose that could help with their mandatory inspections, but the silicone hoses they were using were changing colour and deteriorating quickly.

Aflex introduced the company to the Bioflex Ultra Tube Only (TO) hose which provided excellent flexibility, purity and the non-absorptive, non-leaching characteristics needed by the application. Critically Bioflex Ultra TO was totally unaffected by the CIP cleaning chemicals, while its translucence enabled easy inspection for the duration of the hose life.

Multiple Bioflex Ultra TO hoses have been installed and are playing a vital role in the transfer of pharmaceutical and personal care preparations, eliminating hose deterioration problems and preventing product contamination for the future.
